

press release

FOR IMMEDIATE RELEASE – 18 July 2018

Amarinth delivers \$500K of API 610 OH2 pumps to Schlumberger for use in the Dunga oil field, Kazakhstan

Amarinth, a leading company specialising in the design, application and manufacture of centrifugal pumps and associated equipment to the Oil & Gas, petrochemical, chemical, industrial and power markets, has delivered \$500K of API 610 OH2 pumps to Schlumberger which will be deployed on a process water treatment package in the Dunga oil field, Kazakhstan, operated by Maersk Oil.

The order, for six API 610 OH2 super duplex stainless steel pumps valued at \$500K, was the first that Schlumberger had placed with Amarith. The pumps were required on a very tight 26-week delivery and will be used on a process water treatment package destined for the Dunga oil field in Kazakhstan. The Dunga field, operated by Maersk Oil, is an onshore development located 50 km north east of the town of Aktau on the east coast of the Caspian Sea in western Kazakhstan, and is currently producing around 15,000 barrels of oil per day. The pumps will operate in the challenging Kazakhstan environment that can see temperatures reaching 45C in the summer but plunging to an ice-bound -30C in the winter.

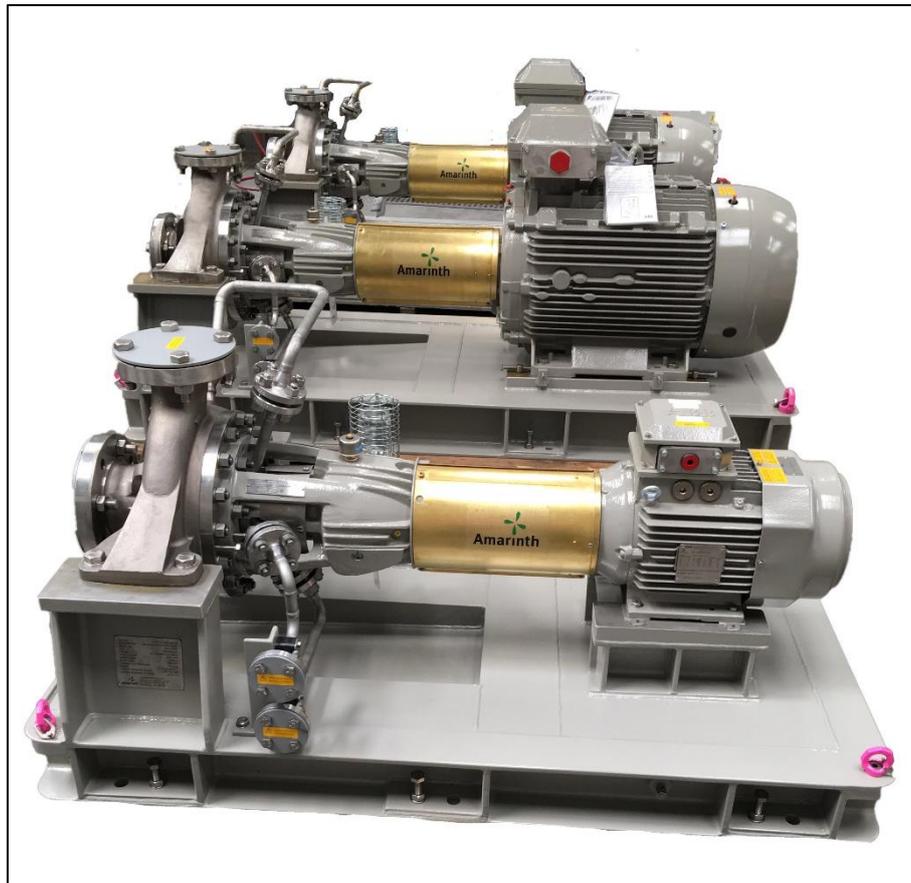

– MORE –

Amarinth had supplied pumps to other Maersk Oil projects over many years and so was already familiar with Maersk specifications. Furthermore, Amarith had manufactured pumps for other fields in Kazakhstan and so was confident handling the complex GOST-K Certificate of Conformity documentary evidence required by Kazakhstan law to prove that equipment meets Kazakhstan requirements and standards.

Oliver Briggins Shaw, Managing Director of Amarith, commented: “We are delighted to have delivered this first order from Schlumberger for Maersk Oil, particularly as the pumps were destined for Kazakhstan, a region where we already have a lot of experience. We look forward to working on future projects.”

Amarinth API 610 OH2 pumps ready for shipment to Schlumberger for use in the Dunga oil field, Kazakhstan

NOTES TO EDITORS:

Founded in 2002, Amarith has harnessed the skills, creativity and passion of people who have worked in the pump industry for many years. Amarith delivers world-leading expertise in the design, application and manufacture of centrifugal pumps and associated equipment to ISO, ANSI & API standards, primarily for the Oil & Gas, petrochemical, chemical, industrial and power markets. The company's portfolio includes:

- **Pumps:** Horizontal and vertical API 610 pumps, chemical and industrial pumps, many of which are interchangeable with the Girdlestone pump ranges, eliminating the need for expensive modifications when replacements are required.
- **Pressure Vessels:** Protect System Plan 52 and 53A and 53B sealant systems with inbuilt condition monitoring for pumps and mixers that are suitable for Safe area up to Zone I.
- **Spares & Service:** High quality, fast lead-time re-engineered spare parts to improve performance and extend pump life, including many which are directly interchangeable with the Girdlestone pump ranges.
- **Packages & Modules:** Condensate Recovery Units manufactured for Spirax Sarco incorporating the innovative Ci-Nergy intelligent variable speed control system, plus bespoke packages & skids built to order.
- **Business Systems:** state-of-the-art e-commerce technologies that deliver 24/7 support enabling customers to select pumps and place orders on-line and then track every stage of manufacture through to delivery, any time, anywhere in the world.

The company operates globally from its base in Rendlesham Suffolk, United Kingdom and has a customer base of world-leading companies, including BP, Shell, ExxonMobil, GlaxoSmithKline, Pfizer, Spirax Sarco, Diageo, AMEC, Fluor and Halliburton.
